

EY Techathon 5.0 Executive Summary

Date of submission: 23/11/24

Team Name	Pilani Crusaders	
College	Birla Institute of Technology and Science Pilani	
Team Members	Shaswat	Adya Srivastava
About Us	Msc. Eco and B.E. CS	B.E. EEE
Contact Details	8447072085 f20220467@pilani.bits-pilani.ac .in	9911439190 f20220518@pilani.bits-pilani.ac .in

PROBLEM OVERVIEW:

Develop an AI-driven platform that streamlines access to government schemes and services for individuals like Priya and develop a curated experience. The solution could leverage AI for tasks such as verifying documents, automating the discovery of eligible schemes, and providing personalized guidance, making it easier for citizens to understand their eligibility and avail the benefits efficiently. You can refer to <https://www.myscheme.gov.in/> for a comprehensive listing of government schemes.

A 24/7 multilingual AI chatbot powered by Bhashini, including speech-to-text and text-to-speech settings for accessibility. "Call Me" feature to talk directly to the AI or connect with a live agent for further assistance.

The app simplifies the application process by autofilling most details based on the user's profile. Users select their desired scheme, upload any required documents, and digitally sign the form via an OTP. The app also guides offline users, syncing their inputs when internet access is restored.

A visual progress bar shows how much of the application is complete, what documents are pending, and the remaining steps. Users can monitor the implementation status of the scheme they applied for, with detailed timelines and updates. If issues arise, they can lodge grievances via a chatbot or voice message, routed to a support team for resolution.

Submission Overview

1. Adaptive AI for Personalized Experiences

- **Behavioral Analysis:** Suggests upcoming or new schemes based on user preferences.
- **Micro-Targeting:** Delivers tailored opportunity alerts, so users never miss out.
- **Predictive Insights:** Recommends schemes based on life stage, trends, and long-term impact.

2. Community-Driven Knowledge Sharing

- **Forums and Peer Assistance:** Enables sharing experiences and advice in a community.
- **Local Experts:** Connect and get guidance from local experts.

3. Accessibility

- **Offline Functionality:** Access schemes and fill forms offline; syncs when online.
- **Progressive Web App (PWA):** Loads minimal functions on low bandwidth, ensuring access even in limited conditions.

4. User-Friendly Onboarding

- **Tailored Onboarding:** Offers voice-guided and video tutorials for users with varying tech familiarity.

5. Simplified Form Filling

- **AI-Powered Document Completion:** Auto-fills forms by analyzing documents from DigiLocker

6. Privacy-First Data Insights

- **Federated Learning:** Processes user data securely to improve scheme recommendations and form filing.
- **Differential Privacy:** Prevents misuse of sensitive information while extracting valuable insights.

7. Blockchain-Enabled Security

- **Identity Management:** Stores documents securely with immutability, ensuring trust in the system.
- **Smart Contracts:** Automate benefit disbursement upon meeting eligibility criteria, while monitoring scheme progress on a calendar and tracking fulfillment levels.

8. Real-Time Application Tracking

- **Progress Bar:** Shows application status visually.
- **Grievance Redressal:** Lodge complaints via voice or text, with AI chatbot support.
